

» Why eZ publish hosting with WebDeal?

eZ publish is now an industrial standard and the leading open source enterprise CMS (Content Management System). Available benefits are many depending on your needs and routine work.

It is important to choose a hosting provider that not only can meet your demands today, but also in the future. Many businesses find themselves limited by their hosting provider. This can be a problematic situation which may affect communication skills, technical solutions and scalability.

WebDeal AS has implemented eZ publish as a key element in the company's business strategy and has acquired specialized knowledge in hosting solutions based on eZ publish CMS. This gives you as a customer a guarantee that your systems will be in the hands of a solution provider that understands the needs and improvements in this area.

Highlights

- Dedicated systems and support channels to eZ publish
- Flexibility and scalability through a wide range of services
- Redundancy and security through enterprise-class infrastructure
- High quality is a primary target
- Customer support and technical staff whose main goal is to understand your needs
- The option to choose open standards above proprietary products

Our hosting platform ensures a low TCO (total cost of ownership) and a high TBO (total benefits of ownership) compared to other providers.

We can offer customised hosting solutions that enables you to realize your ideas and take your products to the market.
